

# You are the focus

## Rehab

The rehabilitative professionals - massage-physiotherapist and Osteopath- are Chronic Pain experts. They will give you a personalized program of exercises to take back home with you.

## Medical team

The medical team, specialized in Chronic Pain conditions, can prescribe adapted medicine while controlling what the patients is already in under and advise on said therapy.

## Doctors

Doctor Domenico Biasi is a specialist in the treatment of CRPS and has been for over 10 years. He is a professor at the University Hospital of Verona. He is well aware of the treatment path with Neridronate, all the way from the original studies performed by Dr. Adami, who was then his mentor at the hospital.

## Dietician

A dietician will give you advice on how to improve your diet, will inform you on food to avoid and food to embrace to help with the inflammation issue connected to CRPS.

## Health Planner

A Health Planner will be at the patient's disposal during his treatment week, for translations, interpreting, transportation, and moral support. The patient's whole trip will be organized in every details so that he can focus on the only important thing: his recovery.

## Nurses

Professional nurses with long experience will limit the inconvenience that can come with an infusion. The Neridronate Treatment does NOT cause pain and there is no risk of jaw necrosis.

## Psychologist

A psychologist will be available to the patients. Psychological support is proven to be an essential add-on in the multidisciplinary approach of the treatment of Chronic Pain Conditions.

## Medicine

Our doctors will prescribe the necessary medicine to ensure a smooth flight back home and can advise some for the inbound flight too. Those medicine would be advised to those scared of facing a long flight.

Differently to everyone else, we offer a 360° approach: a team of doctors built around the patient will offer a multidisciplinary treatment path, under the caring supervision of your Health Planner.
